

Big Giant Circles

BIG GIANT CIRCLES, or **JIMMY HINSON**, is stationed outside of Knoxville, TN, and is a BAFTA nominated music composer and remixer, a gamer, and a staff member of OverClocked ReMix. he has been composing for more than 8 years, and is a recent addition to the wall of sound music team. His composing style revolves around a chiptune based sound, which is produced on FL studio.

IMAGE-LINE appointed him as one of their few "Power Users" along the ranks of names like **JUSTIN LASSEN**, **BASSHUNTER**, **MIKE OLDFIELD**, and **DEADMAUS**. he was also the first remixer to collaborate directly with a game's original composer on his Deus Ex remix Siren Synapse, with **ALEXANDER BRANDON**

Some examples of his work are the soundtracks for Black Ops 2 Multiplayer, Street Fighter 2 Turbo, and Mass Effect 2. He also created the soundtrack for a smaller, ios game, called Pocket Mine. He also composed music for television video games, films, and radio, for example Fox Sports, Animal Planet, HGTV, WEtv, the Dominator, and Kitchen Impossible.

His latest project, **THE GLORY DAYS**, was Kickstarted from September 23, 2013-October 23, 2013 and was funded past it's goal of \$5000, within the intial 20 minutes. this was heavily influenced by his friend, and well-known livestreamer, Sevadus. the project was 1255% funded after the one month time limit.

STORY BEHIND THE NAME:

His name was originated on a snowy day, when he, or his friend, made a comment about a person spinning donuts on the snow, and they thought that Big Giant Circles would make a great band name. when he was submitting his application to overlocked remix, he thought of that story and he thought it was a fitting name.

"When submitting my first rearrangement to OverClocked ReMix, that story popped into my head. Circles suggest many cool things like continuity, recurrence ... perfection, and music can do the same so I ran with it"
