0 to 60	4.8 Sec.

Gas	Premium
Drive Train	RWD
Price (Starting)	\$56,500
Height	55.6
Weight	3704
Doors	2 Door and 4 Door

Performance

Startling is a good way to describe the M3. That’s a lightweight V8 under the hood that weighs less than the previous straight six and it produces 414bhp and 295lb ft. of torque. That’s enough to launch the coupe to 62mph in just 4.8 seconds and on to a limited 155mph. The sedan is slightly slower but you won’t be able to tell.

10/20

Comfort

Both sedan and coupe are very comfortable long distance cars - just like any other 3-Series. You can play with the damper control to soften off the ride if you’re just tooling around, so it will never loosen teeth. It is louder and more aggressive in terms of the engine and damping set-up, but not enough to scare you.

13/20

Cool

Not any more, we fear. Too many jerks have owned them and you’ll be Suspected of being one.

12/20

Practicality

Go for the four-door if you have kids/ carry passengers a lot - it may not have the coupe’s carbon roof, but it realistically provides everything the coupe does with a touch more street-sleeper. The coupe has rear seats, but they’re small and that carbon roof stands out a lot if you choose a pale color..

15/20

Over All

The daddy of all performance cars , you’ll never be disappointed with a BMW M3. They combine the performance of a supercar, the practicality of a saloon and the fun-factor of a trip.
